Chick Production

February 16, 1967

Hatcheries produced 262 million chicks during January, 3 percent more than a year earlier, according to the Crop Reporting Board. The January hatch of broiler-type chicks totaled 221 million, 2 percent more than a year earlier. Broiler-type eggs in incubators on February 1 were up 4 percent from a year earlier.

Egg-type chicks hatched during January are estimated at 41 million, 10 percent more than in January 1966 and a record high for the month in the series beginning with 1955. The January egg-type hatch was above a year earlier in all regions except the North Atlantic where there was a 2 percent decline. The largest regional increase from January 1966 was 20 percent in the South Atlantic, followed by 16 percent in the East North Central, 12 percent in the South Central, 8 percent in the West, and 5 percent in the West North Central. The number of egg-type eggs in incubators on February 1 was 8 percent above a year earlier.

Poult Production

Poult production of all breeds during January 1967 totaled 8,415,000 poults, an increase of 43 percent from the same month a year earlier. This is the fourth consecutive month that the poult hatch has exceeded production the same month a year earlier by more than 30 percent. The number of turkey eggs in incubators on February 1, 1967 was 21,670,000 or 26 percent more than February 1 last year.
